

BUILD YOUR OWN MINECART RAILWAY!

1. Print and copy this page as many times as you want and build a Railway that your Minecart can take anywhere!
2. Have your parents help you cut the straight and curved Railway pieces out with a pair of household scissors.
PRO TIP: Scissors can be sharp and cut you! Be sure to get your parents help before using them.
3. Glue or tape the pieces to a sheet of cardboard so your Railway pieces are nice and sturdy.
PRO TIP: Shipping boxes make a perfect foundation for your Railway pieces.
4. Now figure out where you want your Minecart to go and how to get there! Arrange the Railway pieces in any order you like. Make an oval, or a Minecraft block-shape Railway. How about an Express Railway from your bedroom to the kitchen? It's all up to you and your building skills.
5. After you lay out your Railway, tape the pieces together at each end and you're ready to roll... Woot! Woot!
